PROFESSIONAL SUMMARY

.NET and integration engineer with 3+ years of experience, including 2+ years building and maintaining enterprise C# systems in NHS healthcare (3.6M+ clinical records, zero critical data incidents under a Cyber Essentials Plus security architecture). Delivered a zero-downtime SQL Server to PostgreSQL migration and an end-to-end Oracle Integration Cloud flow. Experienced in REST API design, Docker and Azure DevOps CI/CD across seven environments. Currently an ERP developer (Odoo, Python) at an Odoo Gold Partner. BSc Computer Science, Swansea University (UK).

TECHNICAL SKILLS

Backend / .NET	C#, .NET 8, ASP.NET Core Web API and MVC, Entity Framework Core, LINQ, REST API design, Swagger/OpenAPI
Testing	xUnit (200+ unit and integration tests in CI build gates), Testcontainers
Security	JWT/token authentication, role-based access control
Architecture	Clean Architecture, CQRS with MediatR
Caching and Messaging	Redis, Azure Service Bus
DevOps / Cloud	Azure DevOps CI/CD, Docker, Azure App Service, Azure Key Vault, Git, Application Insights
Databases	PostgreSQL, SQL Server, Oracle Database, PL/SQL
ERP — Oracle	Oracle Integration Cloud (REST, SOAP, database adapters, orchestration), BI Publisher, Oracle Fusion SCM
Frontend	Angular, React.js, TypeScript/JavaScript, HTML5, CSS3
Standards	UK GDPR-aligned development, NHS Cyber Essentials Plus environment, Agile/Scrum
ERP — Odoo	Python ORM, view Inheritance, XML views, QWeb PDF reports

WORK HISTORY

ERP/Odoo Developer | Global Solutions (Odoo Gold Partner) — Jun 2026 – Present

Remote — Employer based in Riyadh, KSA

- Delivered **14** customisations across **6** enterprise client projects in Python, XML views, and QWeb, covering purchase, accounting, sales, and inventory workflows.
- Resolved **45+** client support and enhancement tickets with a median turnaround of **under 24 hours**, collaborating effectively within a distributed remote-first engineering team.

Software Developer | Digital Health and Care Wales (NHS Wales) — Oct 2023 – Dec 2025

Cardiff, Wales, UK

- Maintained RadIS, a radiology information system holding **3.6M+ clinical records** across multiple NHS health boards, with zero critical data incidents over two years inside a Cyber Essentials Plus security architecture.
- Migrated RadIS from SQL Server to PostgreSQL with **zero downtime**, coordinating UAT with clinical and technical stakeholders and preserving integrity across 3.6M+ records.
- Modernised the platform with reusable Angular components integrated with .NET Core REST APIs and secure data access patterns, improving radiologist workflow efficiency.
- Deployed Docker services across seven environments through Azure DevOps CI/CD, with Swagger-documented REST APIs that standardised service contracts and reduced integration errors.
- Wrote **200+ xUnit integration and unit tests** covering core data migration logic and API endpoints, integrating test execution directly into Azure DevOps CI/CD build gates.

- Implemented **role-based access control (RBAC)** and secure token authentication to enforce granular permissions based on clinician roles and health board boundaries.
- Managed **Azure App Services and Azure Key Vault** for secure deployment and centralized management of sensitive database credentials and API keys.

Frontend Developer | Leaders for Banking Services **Mar 2022 – Sep 2022**
Cairo, Egypt

- Built consumer-banking interfaces in React.js on secure REST APIs.
- Set up a systematic API testing process in Postman with integration documentation, supporting collaboration between frontend and backend teams.

EDUCATION & CERTIFICATES

BSc Computer Science — Second Class Honours, Division One (GPA 3.6) | Swansea University, Wales, UK **Graduated 2023**
Dissertation (First Class): UniCertify, a blockchain document verification platform (Solidity, Ethereum, IPFS)
[Click to view certificate]

Oracle Technical Consultant | Truemega Technology Solutions **Feb 2026 – Apr 2026**
Cairo, Egypt — ***[Click to view certificate]***

Cloud Software Development Practitioner | University of Wales Trinity Saint David **Feb 2025 – Jul 2025**
Wales, UK

Database Fundamentals | Mahara-Tech **Jul 2026 – Aug 2026**
Cairo, Egypt — ***[Click to view certificate]***

KEY PROJECTS

Clinical Appointments API (.NET 8) | Personal project — in progress **Oct 2026**

- Building an ASP.NET Core 8 API on PostgreSQL and EF Core, using Clean Architecture and CQRS (MediatR), with overlap-free appointment scheduling enforced at the database level.
- Implementing JWT authentication with role- and resource-based authorisation, Redis caching of slot availability, and Azure Service Bus events for booking notifications.
- Testing with xUnit and Testcontainers; Dockerised, with GitHub Actions CI and Azure App Service deployment planned.

OIC Inventory Integration | Truemega Technology Solutions **Apr 2026**

- Designed an end-to-end Oracle Integration Cloud flow: extracted Fusion inventory transactions through a SOAP BI report, stored and queried them in ATP with the database adapter, validated on-hand quantities through the Fusion REST API, conditionally created miscellaneous receipts and inter-org transfers, and logged every result to ATP.

Enterprise Emergency Department Module | NHS Wales **2024 – 2025**

- Architected an Angular and .NET Core MVC application to digitise emergency-department intake and triage, with reusable components and REST APIs for real-time patient data synchronisation.

RadIS Go — High-Performance Patient Search | NHS Wales **2024**

- Built a clinical search engine with a JavaScript front end and Go services, delivering sub-second queries across 1M+ patient records.
