AHMED KHATIB

Odoo Developer | Healthcare ERP | Python · PostgreSQL

Cairo, Egypt | **+20** 106 660 1616 | Military Status: **EXEMPTED** | **Portfolio** | **LeetCode**
ahmed3li.kh@gmail.com | **linkedin.com/in/ahmed3li-khatib** | **github.com/Ahmedd3ly**

PROFESSIONAL SUMMARY

Odoo developer at an Odoo Gold Partner with 3+ years of software engineering experience, including 2+ years in regulated healthcare maintaining a clinical system of 3.6M+ records with zero critical data incidents. Built a complete Odoo 20 hospital management module (14 custom models, multi-payer billing, QWeb reports, Arabic localisation) covered by a 57-test automated suite. Strong PostgreSQL background, including a zero-downtime SQL Server to PostgreSQL migration. BSc Computer Science, Swansea University (UK).

TECHNICAL SKILLS

ERP — Odoo	Python ORM, `_inherits`, and view Inheritance, XML views, QWeb PDF reports, wizards, sequences, access rights, SQL and Python constraints, TransactionCase testing, data and demo files, and database indexing
Odoo — Extended	Extending core Odoo apps — Sales, HR, Mail, Contacts, Products, Accounting (invoicing), Inventory
Languages	Python, SQL, PL/SQL, JavaScript, C#
Databases	PostgreSQL (trigram and partial indexes, migrations), Oracle Database, SQL Server
DevOps / Cloud	Docker, Git, Azure DevOps, CI/CD Pipelines, GitHub Actions, Odoo.sh
Integration	Oracle Integration Cloud (REST, SOAP, database adapters); Oracle Fusion SCM
Standards	UK GDPR-aligned development, NHS Cyber Essentials Plus environment, Agile/Scrum
API & Tools	RESTful API Design, Postman, Oracle Integration Cloud
Linux	Arch Linux, shell, package management, systemd, Bash, Zsh
Also familiar with	Angular, React, ASP.NET Core

WORK HISTORY

ERP/Odoo Developer | Global Solutions (Odoo Gold Partner) — Jun 2026 – Present

Remote — Employer based in Riyadh, KSA

- Delivered **14** customisations across **6** enterprise client projects in Python, XML views, and QWeb, covering purchase, accounting, sales, and inventory workflows.
- Reduced purchase request processing and verification time from **15 minutes per batch** to **under 2 minutes** by building an automated action trigger and consolidated reporting wizard.
- Resolved **45+** client support and enhancement tickets with a median turnaround of **under 24 hours**, collaborating effectively within a distributed remote-first engineering team.
- Gather requirements with cross-functional teams and implement Odoo-based solutions for enterprise clients.
- Built an Odoo 20 hospital management module end to end (see Projects).

Software Developer | Digital Health and Care Wales (NHS Wales) — Oct 2023 – Dec 2025

Cardiff, Wales, UK

- Maintained RadIS, a radiology information system holding **3.6M+ clinical records** across multiple health boards, with zero critical data incidents over two years inside a Cyber Essentials Plus security architecture.
- Migrated RadIS from SQL Server to PostgreSQL with **zero downtime**, coordinating UAT with clinical and technical stakeholders and preserving integrity across 3.6M+ records.
- Modernised the platform with reusable Angular components on .NET Core REST APIs, improving radiologist workflow efficiency.

- Deployed Docker services across seven environments through Azure DevOps CI/CD, with Swagger-documented APIs that reduced integration errors between dependent modules.

Frontend Developer | Leaders for Banking Services **Mar 2022 – Sep 2022**
Cairo, Egypt

- Built consumer-banking interfaces in React.js on secure REST APIs and set up a systematic Postman API testing process.

EDUCATION & CERTIFICATES

BSc Computer Science — Second Class Honours, Division One (GPA 3.6) | Swansea University, Wales, UK **Graduated 2023**
[Click to view certificate]

Oracle Technical Consultant | Truemega Technology Solutions **Feb 2026 – Apr 2026**
Cairo, Egypt — ***[Click to view certificate]***

Cloud Software Development Practitioner | University of Wales Trinity Saint David **Feb 2025 – Jul 2025**
Wales, UK

Database Fundamentals | Mahara-Tech **Jul 2026 – Aug 2026**
Cairo, Egypt — ***[Click to view certificate]***

KEY PROJECTS

Odoo v20 Hospital Management Module | Global Solutions *[Project on Github]* **Oct 2026**

- Architected a custom module with 14 models plus extensions of `hr.employee`, `sale.order`, `res.partner` and `product`, covering patient registration, appointments, clinical records, company-contract billing and inpatient admissions with beds and transfers.
- Modelled patients on Odoo contacts with `_inherits` and clinicians on `hr.employee`; added a computed line discount on `sale.order` lines that splits each bill between a company and the patient.
- Enforced business rules with SQL and Python constraints: overlap-free doctor scheduling, one patient per bed, medical records locked after completion.
- Delivered three QWeb PDF reports, an Arabic translation (~ 420 terms), trigram and partial indexes, and a 57-test TransactionCase suite run on Odoo 20.
- Secured data with record rules so doctors see only their own appointments and records, plus multi-company rules.

OIC Inventory Integration | Truemega Technology Solutions **Apr 2026**

- Built an end-to-end Oracle Integration Cloud flow that extracted Fusion inventory transactions through a SOAP BI report, stored and queried them in ATP, validated on-hand quantities through REST, created conditional receipts and inter-org transfers, and logged every result.
